Int. J. Pres. Ves. & Piping **39** (1989) 407–409

CONTENTS OF VOLUME 39

Numbers 1 & 2

Special Issue
MATERIALS ASPECTS OF LIFE
EXTENSION OF POWER PLANTS

Guest Editorial 1

The Expected and Actual Life of Steam Turbine Bolts and Castings . . . 3
K. H. MAYER (FRG)

The Danish Experience in Materials Aspects in Power Plant Life Assessment and in Life Extension 29
RUDOLPH BLUM (Denmark)

Power Plant Life Estimation and Extension: The Belgian Experience from the Users' Point of View 41
M. DE WITTE (Belgium)

The Potential of Medium- and Long-Term Life Predictions for High-Temperature Components in Power Plants 57
The late BURKHARD NEUBAUER & FELIX BIETENBECK (FRG)

New High-Precision Creep Procedures for Accurate Life Extension of Plant . 73
B. WILSHIRE (UK)

Transfer of Mechanical Test Data from the Laboratory to the Real Plant . . 83
MARC STEEN (Belgium)

High Temperature Behaviour of Ferritic Pipe Welds: Experience of Long-Term Testing 109
M. C. COLEMAN (UK)

Life Prediction Methods for Constrained Grain Boundary Cavitation . . 119
HERMANN RIEDEL (FRG)

Accuracy Requirements for Life Assessment 135
PERTTI AUERKARI & JORMA SALONEN (Finland)

Number 3

Continuum Damage Mechanics Analysis of Crack-tip Zone 143
LU YINCHU & ZHOU JIANPING (People's Republic of China)

Int. J. Pres. Ves. & Piping (**39**) (1989)—© 1989 Elsevier Science Publishers Ltd, England.
Printed in Great Britain

Polyoptimization Problem for Boiler Drum Design 155
JERZY KOWALSKI (Mexico) & KONRAD PYLAK (Poland)

Finite Element Analysis of a Desuperheater Vessel Steam Inlet Nozzle Subjected to Thermal Loads 169
Y. C. LAM & P. U. TRAUNER (Australia)

High-Temperature Crack-Arrest Behavior of Prototypical and Degraded (Simulated) Reactor Pressure Vessel Steels 187
D. J. NAUS, J. KEENEY-WALKER, B. R. BASS, R. J. FIELDS, R. DE WIT & S. R. LOW III (USA)

A Quadrilateral Cylindrical Element for Elasto-Plastic Analysis of Nozzle–Vessel Intersection 207
WU ZENG LIANG & LU KE CHENG (People's Republic of China)

Number 4

Special Issue

INTERNATIONAL ATOMIC ENERGY AGENCY'S (IAEA) SPECIALISTS' MEETING ON INSPECTION OF AUSTENITIC DISSIMILAR MATERIALS AND WELDS

Foreword 223

Guest Editorial 225

On the State of the Art of the Inspection of Austenitic Welds with Ultrasound . 227
A. W. EBERHARD NEUMANN (Germany)

Ultrasonic Characterisation and Inspection of Austenitic Welds 247
R. J. HUDGELL, G. M. WORRALL, J. FORD & B. S. GRAY (UK)

Applications of Ultrasonic Mode Conversion Techniques 265
W. H. VAN LEEUWEN (The Netherlands)

Detection of Defects in Austenitic Pipings and Welds of Nuclear Power Plant Components by Ultrasonics 279
D. KALKHOF, W. GÖRNER, CH. SCHURIG & CH. MÜLLER (GDR)

Ultrasonic Inspection of Coarse Grain Austenitic Materials and Weld Joints . 293
I. N. ERMOLOV (USSR)

Ultrasonic Testing of Thin-walled Austenitic Welds 295
J. WESSELS (FRG)

Planning Ultrasonic Techniques for Optimized Inspection of Dissimilar Welds . 313
F. MOHR, M. KRÖNING & U. SCHWANKE (FRG)

Inspection of Dissimilar Metal Welds Using Horizontally Polarized Shear (SH-)Waves and Electromagnetic Ultrasonic (EMUS-)Probes 331
G. HÜBSCHEN & H. J. SALZBURGER (FRG)

Number 5

Fatigue Life Response of ASME SA 106-B Steel in Pressurized Water Reactor Environments 345
JOSEPH B. TERRELL (USA)

A Weight Function Approach to Stress-Intensity Factors for Half-Elliptical Surface Cracks in Cylindrical Pressure Vessels Subjected to Thermal Shock . 375
R. X. XU & X. R. WU (People's Republic of China)

The Limit Analysis of an Axisymmetric Circular Cylinder of Arbitrary Length with One End Free, under Applied Shear Force and Moment and Zero Axial Force . 393
M. ROBINSON (UK)

Comparing Dynamic Crack Initiation and Crack Arrest 403
A. R. ROSENFIELD (USA)
